FRAME MODELS

At TJ Cycles all of our frames are truly hand built, with all the mitres hand cut with great care. Each frame is built in a precision jig, to give a perfectly built frame. The frames are designed around a 73° head and seat angle, but can be varied according to the customer's requirements. The frame is then drawn out to the customer's specification, and when complete we will begin building your frame. All frames include an assembled headset and plain enamel finish, brake cable stops on the top tube and drillings to take Allen key brake fixings. This gives you a basic frame price, so you are then able to select from the extras list to further customise your frame.

“THE FIXIE”

Due to the increased interest in fixed wheel bikes over the recent years, we have added the “FIXIE” to our range. The specification of a track frame may vary from that of a road bike, but all our frames are made to suit our customer's requirements. We also offer braze on's for 3 speed hub gears in the price, and can also supply the 3 speed fixed hub if required.

Orthodox: £625.00

Flying Gate: £700.00

“THE DOVEDALE”

After many years of producing this frame, it is still the most popular of our models with touring cyclists. It is most commonly built with Reynolds “631” tubing. The lugs, fork crown, bottom bracket and dropouts are all of top quality investment castings.

Orthodox: £650.00

Flying Gate: £725.00

“THE DOVEDALE DELUX”

As “Dovedale” but built with special arrow shaped webbed lugs and bottom bracket. A fancy fork crown and lugged dropouts are also included to give that extra special look. The headset is of higher quality and we fit our metal head badge to this frame to give a very distinctive appearance.

Orthodox: £715.00

Flying Gate: £790.00

“THE AUDAX GRAN SPORT”

This frame is very similar to the “Dovedale” but carries its own distinctive lug work. This includes some hand cut items, and an oversize top tube to give a strong but light frame. We find that there are very personnel requirements for braze on's with this type of frame, for example how many bottle bosses are required and cable guides etc. So again we give a basic price, you can then just add what you require from our extras list.

Orthodox: £750.00

Flying Gate: £825.00

“THE TREVARNA”

This is a very special frame built with many hand crafted items including the beautiful lug work, as shown in the lug design section of our web site at www.tjcycles.co.uk. Many hours of craftsmanship goes into the building of this frame. The very best 1" headset and our special metal head badge are included in the price.

Orthodox: £900.00

Flying Gate: £975.00

“THE FLYING GATE TANDEM”

This frame is only built to the flying gate design, as it has proved to give one of the smoothest rides of all tandems and responds as a solo when riding it. The frame is built with a mixture of tandem tubing and 631, incorporating the TJC's special stiffened fork crown and steerer. No specification is given for this frame, as it is preferred to be done by consultation.

Flying Gate: £1350.00

All prices include VAT @17.5%
